EDUCATION

AKTU University, B.N College of Engineering 2022-2025
Bachelor of Technology in Computer Science & Engineering

BTEUP University, Diploma in Computer Science & Engg. 2018-2021

Relevant Courses: SQL, Python, data science

PROJECT

Bank Loan Management Dashboard
Designed and implemented a data-driven dashboard to streamline loan lifecycle management, reduce risk, and enhance business profitability.

- **Data Analysis & Visualization:** Developed and executed complex SQL queries to extract, clean, and analyze raw loan data, serving as the foundation for an interactive business intelligence dashboard
- **Strategic Decision Support:** Designed and deployed a dynamic dashboard that visualized key metrics such as loan performance, repayment status, and portfolio health, enabling senior management to make informed, data-driven decisions.
- **Risk Mitigation:** Created targeted visual reports that identified high-risk loans and potential delinquency trends, allowing the team to proactively manage accounts and **reduce the number of non-performing loans by X%**
- **Operational Efficiency:** Automated data reporting and trend analysis through the dashboard, which streamlined loan management processes and **improved operational efficiency by Y%**.
- **Business Impact:** Translated complex datasets into clear, actionable insights, highlighting opportunities to optimize loan products and leading to a **Z% increase in portfolio profitability**

Global Superstore Dashboard
Designed and implemented a comprehensive dashboard to analyze global sales performance, forecast profitability, and optimize business strategies.

- **Strategic Sales Analytics:** Developed and executed complex SQL queries to create a business intelligence dashboard that visualizes sales, profit, and order trends across regions and categories
- **Performance Forecasting:** Implemented a profit rate and forecasting model to predict future performance, providing leadership with actionable insights to inform financial planning.
- **Target Achievement Tracking:** Created a dashboard component to track sales targets, allowing for real-time performance monitoring and data-driven adjustments to sales strategies
- **Geographic and Product Analysis:** Visualized regional performance, top-selling products, and top/bottom countries to identify market strengths and weaknesses and optimize product strategy.
- **Data-Driven Insights:** Translated complex datasets into clear, actionable insights, enabling a **X% increase in profitability** and a **Y% improvement in sales target achievement** by identifying key trends..

CAMPUS AND COMMUNITY LEADERSHIP

Samsung Innovation Campus Sept 2024–October 2024
Achievement – Completed Intensive Data Analytics Training

- Completed an extensive Big Data training program, applying skills in data manipulation and analysis to large datasets.
- Applied theoretical knowledge to practical projects, enhancing understanding of big data technologies.

Excel and Google Sheets Proficiency Aug 2025

- **Provider:** Udemy
- Data manipulation and analysis in Microsoft Excel and Google Sheets.

SKILLS

Programming Languages & Libraries

- **Python:** pandas, NumPy, scikit-learn, matplotlib, seaborn
- SQL

Data Visualization & Business Intelligence

- Power BI

Tools & Applications

- Microsoft Excel (including PivotTables, VLOOKUP, charts)
- Google Sheets
